

ReWalk Robotics Ltd. Conflict Minerals Compliance Policy

The U.S. Securities and Exchange Commission (the “SEC”) has approved the final rule (the “Rule”) regarding the sourcing of “conflict minerals” under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. Under the Rule, publicly-traded companies, such as ReWalk Robotics Ltd., must report to the SEC whether “conflict minerals” (tantalum, tin, tungsten and gold) originating in the Democratic Republic of Congo (DRC) or adjoining “covered countries” (Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia) are present in the products the reporting companies manufacture or contract to manufacture, if the conflict minerals are necessary to the functionality or production of a product.

The sale of conflict minerals mined in the DRC and other covered countries have funded armed conflicts in that region, and those conflicts have led to numerous human rights abuses and atrocities. (For further information, see also link to the SEC rule at <http://www.sec.gov/rules/final/2012/34-67716.pdf>)

ReWalk Robotics Ltd. aims to use “conflict-free” minerals in our products, and we support recent government and industry actions to increase supply chain transparency to facilitate the ability of companies to source conflict-free minerals. Therefore, we are taking measures, consistent with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict – Affected and High Risk Areas (the “OECD Guidelines”), to meet the applicable reporting obligations, including enhancing our supply chain due diligence and internal controls relating to conflict minerals. See also the OECD Guidelines at <http://www.oecd.org/fr/daf/inv/mne/mining.htm>.

ReWalk is committed to respecting human rights and the environment in accordance with applicable laws and regulations. As part of our conflict minerals compliance policy, we are requesting that all of our relevant suppliers of raw materials or products covered by the Rule complete the standardized Conflict-Free Smelter Initiative’s (the “CFSI”) Conflict Minerals Reporting Template. We plan to use this supply chain due diligence process to drive accountability within the supply chain by encouraging suppliers to use smelters and refiners which have been validated as conflict-free by the CFSI’s Conflict-Free Smelter Program. We also expect that these suppliers will partner with us to (i) provide appropriate information and conduct necessary due diligence in order to facilitate our compliance with the Rule and (ii) adopt appropriate sourcing practices so that conflict minerals are sourced only in a manner that results in products and materials that are conflict-free.

Suppliers and other external parties are encouraged to contact us if they wish to seek guidance on the application of this approach, or if they wish to report suspected abuse online via <http://rewalk.com/contact/>.
